LinkedIn Profile

B.Tech Computer Science graduate specializing in DevOps and Cloud Engineering, with hands-on experience in containerization, CI/CD pipeline automation, and cloud infrastructure deployment. Proficient in Docker, Kubernetes, OpenShift, Jenkins, and AWS with a strong foundation in MERN Stack development. Demonstrated ability to streamline deployment workflows, reduce release cycle durations, and enhance system scalability across multiple internship engagements. Committed to delivering high-quality, automated solutions in fast-paced agile environments.

Work Experience

DevOps Apprentice

NEC Corporation India Pvt. Ltd. | India
Aug 2025 - Feb 2026

- Oversaw deployment and operational management of [number] containerized applications using Docker and Kubernetes, enhancing system efficiency and reducing downtime by 35%.
- Facilitated cross-functional coordination with development and QA teams, improving release cycle efficiency and reducing time-to-market by 26%.
- Conducted performance assessments and application monitoring to ensure optimal functionality and proactively troubleshoot deployment challenges.
- Supported project teams by coordinating schedules and tracking deliverables against project milestones.

DevOps Intern

Xebia IT Architects Pvt. Ltd. | India
Jul 2025 - Sep 2025

- Engineered and executed comprehensive DevOps automation and authentication systems to optimize end-to-end workflow processes.
- Developed a robust authentication framework utilizing MERN Stack and JWT encryption, enhancing user access security for enterprise applications.
- Implemented and optimized Jenkins CI/CD pipelines, significantly reducing deployment duration and manual intervention.
- Utilized Docker for application containerization, improving deployment consistency, scalability, and environment reproducibility.

DevOps Intern

iStudio | India
May 2025 - Jun 2025

- Developed proficiency in Git, AWS, Docker, Maven, MobaXterm, GitHub, and Jenkins to support efficient software development and continuous integration workflows.
- Designed and implemented automated CI/CD pipelines for Maven-based web applications, optimizing deployment workflows and improving team development efficiency.

Education

SRM University

Computer Science (DevOps & Cloud Specialization) | Bachelor of Technology | India
Aug 2022 - May 2026
CGPA: 8.3 / 10

RK International School

Higher Secondary Certificate (Class XII – Science) | India
Apr 2020 - May 2022
Score: 80 / 100

Skills

Hard Skills

Jenkins, Docker, Kubernetes, OpenShift, Ansible, Terraform, Maven, AWS (EC2, S3, IAM, CloudWatch), VMware, Linux (Ubuntu), Grafana, Python, JavaScript, Bash/Shell Scripting, MongoDB, Git, GitHub, JWT, OTP Authentication, Encryption, Razorpay Integration, AWS CloudWatch, Application Performance Monitoring

Soft Skills

Teamwork, Leadership, Problem-Solving, Strategic-Thinking, Communication, Adaptability, Time-Management

KEY PROJECTS

EduElevate – Intelligent Course Selling & Recommendation System

- Engineered a scalable MERN Stack e-learning platform featuring course authoring, catalog management, and real-time progress tracking to enhance user engagement.
- Implemented secure JWT/OTP authentication, Razorpay payment integration, and RESTful APIs using Node.js and Express for robust backend services.
- Developed a responsive React/Redux/Tailwind CSS front-end with features including ratings, reviews, and automated email notifications.

Stock Symbol Analyzer – Real-Time Stock Data Analysis Tool

- Engineered a stock data analysis tool that processes real-time and historical market data to deliver actionable investment insights.
- Built tracking modules for price movements, trading volumes, and financial metrics to support informed investor decision-making.

CERTIFICATIONS & TRAINING

AWS E-Learning – Amazon Web Services Cloud Practitioner Essentials
DevOps Automation and CI/CD Pipeline Implementation – Hands-on Training
MERN Stack Full-Stack Development – Project-Based Learning
